Horizon with view

Horizon allows organizations to deliver virtualized or remoted desktops and applications through a single platform and support end users with access to all of their desktops and applications in one place.

Desktops and Applications Delivered Through a Single Platform
Deliver virtual or remoted desktops and applications through a single platform to streamline management, easily entitle end users and quickly deliver the Windows resources end users need, at the speed they require.
Horizon 6 now supports:

- Single platform for delivering hosted applications and desktops running Microsoft Windows Remote Desktop Services

Unified Workspace with Great User Experience
With Horizon 6, IT can deliver desktops and applications (inclusive of hosted RDS apps, packaged ThinApps, SaaS apps and even virtualized apps from Citrix) to end users through a unified workspace with Blast Performance to enable consistently great experiences across devices, locations, media, and connections.

- XenApp 5.0 and above, Microsoft hosted RDS apps and desktops for Windows Server 2008 and above, SaaS applications and packaged applications with ThinApp 5.0
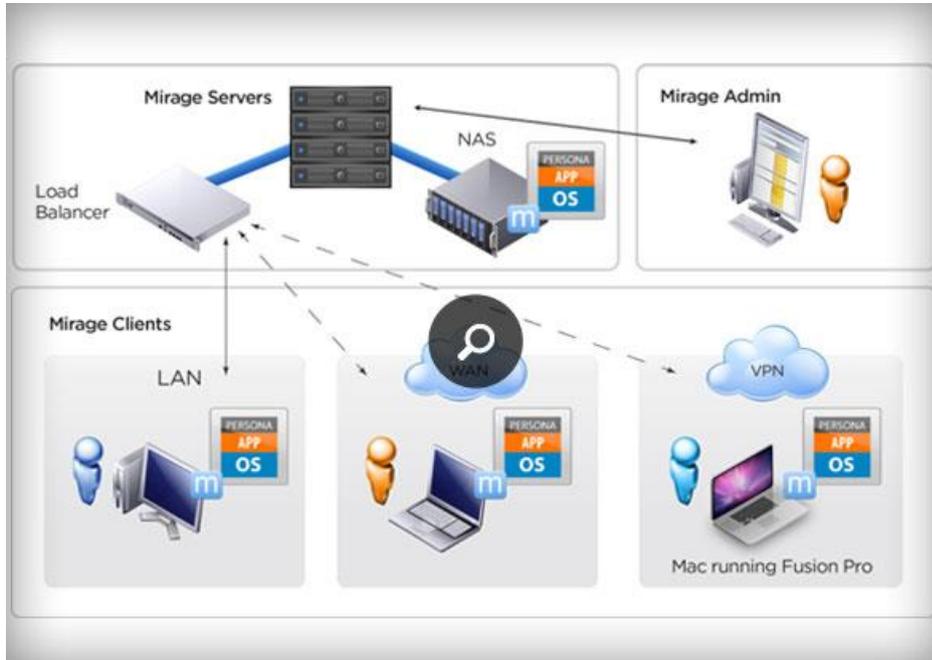

Blast Performance includes:

- Blast Adaptive UX—Optimized access across the WAN and LAN through an HTML browser or our purpose-built desktop protocol PCoIP

- Blast Multi-media—High performance multi-media streaming for rich user experience

- Blast 3D—Rich virtualized graphics delivering workstation-class performance

- Blast Live Communications—fully optimized unified communications and real-time audio and video support. Horizon 6 now includes support for Microsoft Lync with Windows 8

- Blast Unity Touch—intuitive and contextual user experience across devices making it easy to run Windows on mobile

- Blast Local Access—Access to local devices, USB and device peripherals

- Horizon Clients for Blast—Unified client for consistently great experience across devices and locations

Central Image Management of Virtual, Physical and BYO Images
Centrally manage virtual, physical and BYO images to simplify operations, reduce costs, and maintain compliance. With Horizon (with View), IT can deliver Windows services at the speed end users expect with the efficiency business demands.

- Central image management is supported for physical desktops running Windows XP, Vista, 7, 8, and 8.1

- Full-clone persistent virtual desktops running Windows XP, Vista, 7, 8, and 8.1

- BYO devices running Windows, Linux, or Mac OS

Closed-Loop Management and Automation
